Código de "ValidAccountFixture" para "ValidAccountModel"

```php
<?php

class ValidAccountFixture extends CakeTestFixture {

    public $import = array(
        'connection' => 'default',
        'model' => 'ValidAccount',
        'records' => true
    );

}
```

Código de "ValidAccountTest"

```php
<?php
App::uses('ValidAccount', 'Model');

class ValidAccountTest extends CakeTestCase {

    public $fixtures = array(
        'app.valid_account'
    );

    public $autoFixtures = false;

    public function testValidAccountModel() {
        $result = $this->loadFixtures('ValidAccount');
        debug($result);
    }

    public function setUp() {
        parent::setUp();
        $this->ValidAccount = ClassRegistry::init('ValidAccount');
    }

    public function tearDown() {
        unset($this->ValidAccount);

        parent::tearDown();
    }

}
```

Código de "ValidAccountsControllerTest"

```php
<?php
App::uses('ValidAccountsController', 'Controller');

class ValidAccountsControllerTest extends ControllerTestCase {

    public $fixtures = array(
        'app.valid_account'
    );

    public function testIndex() {
        $result = $this->testAction('/valid_accounts/index');
        debug($result);
    }

    public function testView() {
        $result = $this->testAction('/valid_accounts/view/1');
        debug($result);
    }

    public function testAdd() {
        $result = $this->testAction('/valid_accounts/add');
        debug($result);
    }

    public function testAddCard() {
        $result = $this->testAction('/valid_accounts/add_card');
        debug($result);
    }

    public function testAddPaypal() {
        $result = $this->testAction('/valid_accounts/add_paypal');
        debug($result);
    }

    public function testEdit() {
        $result = $this->testAction('/valid_accounts/edit/1');
        debug($result);
    }

    public function testDelete() {
        $result = $this->testAction('/valid_accounts/delete/1');
        debug($result);
    }

}
```

Resultados de las pruebas unitarias

Running ValidAccountTest

CAKEPHP POWER

1/1 test methods complete: **1** passes, **0** fails, **0** assertions and **0** exceptions.

Time: 0.12805008888245 seconds

Peak memory: 5,073,760 bytes

Run more tests | Show Passes | Enable Debug Output | Analyze Code Coverage | All options enabled

Resultado de la prueba para el Modelo ValidAccount (ValidAccountTest)

Running ValidAccountsControllerTest

CAKEPHP POWER

✓ **PASSED**
testIndex (0.149258852005 seconds)

✓ **PASSED**
testView (0.050496101379395 seconds)

✓ **PASSED**
testAdd (0.060760021209717 seconds)

✓ **PASSED**
testAddCard (0.04879903793335 seconds)

✓ **PASSED**
testAddPaypal (0.052639007568359 seconds)

✓ **PASSED**
testEdit (0.047508001327515 seconds)

✓ **PASSED**
testDelete (0.050055027008057 seconds)

7/7 test methods complete: **7** passes, **0** fails, **0** assertions and **0** exceptions.

Time: 0.4595160484314 seconds

Peak memory: 7,476,816 bytes

Run more tests | Show Passes | Enable Debug Output | Analyze Code Coverage | All options enabled

Resultado de la prueba para el Controlador ValidAccounts (ValidAccountsControllerTest)
